Computer Engineering Nov 07 2020 Computer Engineering: A DEC View of Hardware Systems Design focuses on the principles, progress, and concepts in the design of hardware systems. The selection first elaborates on the seven views of computer systems, technology progress in logic and memories, and packaging and manufacturing. Concerns cover power supplies, DEC computer packaging generations, general packaging, semiconductor logic technology, memory technology, measuring (and creating) technology progress, structural levels of a computer system, and packaging levels-of -integration. The manuscript then examines transistor circuitry in the Lincoln TX-2, digital modules, PDP-1 and other 18-bit computers, PDP-8 and other 12-bit computers, and structural levels of the PDP-8. The text takes a look at cache memories for PDP-11 family computers, buses, DEC LSI-11, and design decisions for the PDP-11/60 mid-range minicomputer. Topics include reliability and maintainability, price/performance balance, advances in memory technology, synchronization of data transfers, error control strategies, PDP-11/45, PDP-11/20, and cache organization. The selection is a fine reference for practicing computer designers, users, programmers, designers of peripherals and memories, and students of computer engineering and computer science.  
How an Engineering Professor Becomes a Spiritual Philosopher Mar 12 2021 Have you met an engineering professor? Have you met an engineering professor who is deep into spirituality and writes spiritual books? I have, and he is me. I had worked as an engineering professor in a university in Singapore. I now write philosophical, self-help and spiritual books. For an engineering professor to become a spiritual author is unusual to say the least. Indeed, it is this unusualness that prompted me to write this book. Engineering and spirituality are often perceived as two ends of a spectrum, and it is. As engineering deals with the physical, and spirituality deals with the non-physical, there is actually tremendous synergy once they are combined. In this book, there are ten chapters in which I share my physical and spiritual journey. They are: (1) Study years, (2) Working years, (3) Academic years, (4) From an engineering professor to a spiritual author, (5) Care for the dying, (6) Being unemployed, (7) Return as consultant, (8) Into politics and socio-political writings, (9) Becoming a spiritual philosopher, and (10) Epilogue. You are invited to join me on this journey. I hope this sharing is beneficial to you. May your life be filled with peace, love, joy and harmony!  
Engineering Notebook Sep 25 2019 Engineering Notebook Dotted Log Book For Audio Engineer: Sound Engineer Journal Worst Sound Guy Ever Gift You love sounds and electrics? You are a proud audio engineer? Then get this cool Worst Sound Guy Ever Gift Journal now or use it as a birthday or christmas gift idea for someone who loves sounds and electrics. You like to use your brain, ears and sound equipment and always want to be at the university, lab or construction site? Don't think any longer and grab this Engineering Notebook Log Notebook now! If you like this Engineering Notebook logbook or looking for some more blank dotted journals like this, then feel free to click our brand at the top of this page (right over the title). We always try to provide new designs to our customers, so maybe right for you. Here you always will find a perfect gift idea for your birthday kid or for every other occasion, like easter, back to school, fathers day, mothers day, halloween, christmas, new year and so on. So don't click around anymore and get your product right here!

Engineer Engifar Jul 16 2021 Find out about more artful journals by clicking the author link This Engineering Journal is a lovely tool to keep track of your thoughts. Jot down your wildest ideas that come to your mind and never lose them again. More than 100 pages of lined paper made for writing to keep your notes organized. With custom sized pages (6" x 9") and soft cover this notebook is perfect for writing at school, keeping track of your daily routine or writing to-do lists. With it's artful cover page this journal will always brighten up your life and be an eye-catcher for everyone else. Nikola's Engineering Journals are perfect for: Diaries Composition Books Birthday Planners Scrapbooks Christmas Wish Lists Coworker Gifts Creative Working Homework Have Fun & Stay Organized  
Process Systems Engineering for Biofuels Development Oct 26 2019 A comprehensive overview of current developments and applications in biofuels production Process Systems Engineering for Biofuels Development brings together the latest and most cutting-edge research on the production of biofuels. As the first book specifically devoted to process systems engineering for the production of biofuels, Process Systems Engineering for Biofuels Development covers theoretical, computational and experimental issues in biofuels process engineering. Written for researchers and postgraduate students working on biomass conversion and sustainable process design, as well as industrial practitioners and engineers involved in process design, modeling and optimization, this book is an indispensable guide to the newest developments in areas including: Enzyme-catalyzed biodiesel production Process analysis of biodiesel production (including kinetic modeling, simulation and optimization) The use of ultrasonication in biodiesel production Thermochemical processes for biomass transformation to biofuels Production of alternative biofuels In addition to the comprehensive overview of the subject of biofuels found in the Introduction of the book, the authors of various chapters have provided extensive discussions of the production and separation of biofuels via novel applications and techniques.
